DRAMINSKI S.A.

9th april 2015

I'm a spanish cocker spaniel breeder that purchased an OVULATION DETECTOR and I have been using it for fourteen years with excellent results. Even two friends bought their Detectors because of me. My gratitude to the company is so much that I named one of my top winning males DRAMINSKI.

It is very easy to use and helps to avoid a lot of vet progesterone tests (time and money). In my country is not easy to find a lab which gives the progesterone results before than 24 hours so the detector is "as good as gold" when you have to drive a long distance to the stud dog home for the mating.

The most spectacular case was when the female of another breeder that missed for three times was taken at home for the new season and, according to the Draminski readings, was mated on the seventh day of the heat and having... six puppies.

José Ramón Guillamón.
